

List of Lab Works

Lab No.	Title / Question	Submission Date	Signature	Remarks
4(a)	Write a program to demonstrate various ways to create an array in JS.	February 9, 2024		
4(b)	Write a program to demonstrate two-dimensional and three-dimensional array creation and accessing elements from those arrays.	February 9, 2024		
4(c)	Write a program to illustrate forEach() method to iterate an array.	February 9, 2024		
4(d)	Write a program to illustrate for-of and for-in statements in JS.	February 9, 2024		
4(e)	Write a program to delete an element from given position of an array.	February 9, 2024		

4(f)	Write a program to illustrate use of array methods.	February 9, 2024		
5(a)	Write a program to illustrate how a function is created using -function declaration statement and -function expression	February 9, 2024		
5(b)	Write a program to demonstrate anonymous function and arrow functions in JS .	February 9, 2024		
5(c)	Write a program to demonstrate following function invocation techniques in JS: -As functions -As methods -As constructors -Indirectly through their call() and apply() methods	February 9, 2024		

	-Implicit function invocation			
5(d)	Write a program to prove the statement "arguments in JavaScript are passed to function by value".	February 9, 2024		
5(e)	Write a program to demonstrate the use default parameters in JS function.	February 9, 2024		
5(f)	Write a program to illustrate the use of arguments object in JS function	February 9, 2024		
5(g)	Write a program to illustrate the use of rest parameters in JS function.	February 9, 2024		
6(a)	Write a program to demonstrate how an object is created using object literal and how	February 9, 2024		

	the properties of the objects are accessed.			
6(b)	Write a program to demonstrate JS object creation using Object.create() function.	February 9, 2024		
6(c)	Write a program having a constructor function and create some objects from that function.	February 9, 2024		
6(d)	WAP to demonstrate deletion of a property from JS object.	February 9, 2024		
6(e)	WAP having JS object with function, another object and array as values of it's properties. Program should contain statements to access those	February 9, 2024		

	properties and display them.			
6(f)	WAP to demonstrate getters and setters in JS object.	February 9, 2024		
7	Explore the following built-in JS objects and write programs to show the use of some properties and methods of these objects. - Math - String - Number - Object - Function - Error - Boolean - Array	February 9, 2024		
8(a)	Write a program to demonstrate different ways to create date object in JS.	February 9, 2024		
8(b)	Write a program to show the use of getter	February 9, 2024		

	methods of date object in JS			
8(c)	Write a program to show the use of following setter methods of date object in JS.	February 9, 2024		
8(d)	Create a web page that takes date of birth as input and display the age.	February 9, 2024		
8(e)	Create a web page having a digital clock blinking each second and displaying correct time. The page also should display the current date.	February 9, 2024		
8(f)	Write a program to display the date before after given – Days – Hour	February 9, 2024		
9	Create a web page containing stop watch	February 9, 2024		

10(a)	demonstrate different ways of registering events	February 9, 2024		
10(b)	take two numbers and three buttons each labeled with 'add', 'subtract' and 'multiply'.	February 9, 2024		
10(c)	demonstrate mouse event handling	February 9, 2024		
10(d)	demonstrate keyboard event handling	February 9, 2024		
10(e)	demonstrate form event handling	February 9, 2024		
10(f)	demonstrate window/document event handling	February 9, 2024		
10(g)	demonstrate input event handling.	February 9, 2024		
11(a)	WAP to display inner and outer width and heights of browser window	February 9, 2024		
11(b)	demonstrate the use of open() and close() window methods	February 9, 2024		

11(c)	the use of setTimeout() and clearTimeout() methods of window objects.	February 9, 2024		
11(d)	the use of setInterval() and clearInterval() methods of window objects.	February 9, 2024		
11(e)	the use of different properties of location object.	February 9, 2024		
11(f)	the use of following methods of location object. assign() , replace() , reload()	February 9, 2024		
11(g)	following properties and methods of history object.	February 9, 2024		
11(h)	the usages of different properties and methods of navigator object.	February 9, 2024		
11(i)	the use of frame object with	February 9, 2024		

	different properties and methods.
